

Zoom Cameras

for Windows 98/Me/XP Computers

Web Cameras

The ZoomCam Model 1592 and 1598 provide true color video or color snapshots on Windows 98/Me/XP computer with a USB port. The Model 1598 camera provides a high-resolution 640 X 480 output, an integrated high-sensitivity microphone, and a versatile mounting base which is suitable for use with either a laptop or desktop computer. The very affordable Model 1592 is Zoom's lowest-cost camera, and provides 352 X 288 resolution with a higher resolution of 640 X 480 available using software interpolation.

Both cameras are bundled with a full-featured suite of software applications for video conferencing, audio and video capture, and image management.

Features of both cameras include:

- CMOS camera with USB connector
- Easy plug-and-play installation
- Automatic exposure and white balance adjustment to give optimum performance in a variety of lighting conditions
- Object edge enhancement to provide improved image quality
- Microsoft NetMeeting compatible to provide video conferencing and online chat
- Recording of True Color (24 bit) live video
- Full-featured applications software and integrated USB cable
- Focus of 3 centimeters (approximately one inch) to infinity

Applications software for both cameras include:

- Video mail
- Audio/video recording and playback
- Premise surveillance
- Video conferencing
- Still image snapshots
- Special effects editing for photos
- Video games
- Album and greeting card creation
- Image manager
- Image interpolation

- Convenient snapshot button for capture of still images
- Camera tilt angle of 120 degrees, plus or minus, from parallel
- One-year limited warranty

Portable Digital Cameras with PC Video

The Zoom DualCam 1300 and ZoomCam 100 USB are pocket-sized digital cameras and PC video cameras. Use these cameras with your computer as a Webcam, or unplug them for use anywhere. Small enough to fit in your pocket or purse, these cameras can go with you everywhere so you never have to miss another important picture. Just point, shoot and capture either still images or streaming video using the built-in memory. Plug these cameras into the USB port of your PC and download all of the stored images in seconds using the software provided.

When connected to a PC's USB port, these cameras will continuously store or send live videos and are powered by the USB port of the PC.

Bundled software applications with both the DualCam 1300 and the ZoomCam 100 USB include:

- Photo editing and storage
- Video recording and playback
- Image interpolation

Model 1599 DualCam 1300
